PERSONAL PROJECTS

Account Aggregator (AA) (03/2017 - 01/2021)

- An Account Aggregator provides data to a Customer or Financial Information User (FIU) from a Financial Information Provider (FIP) based on the user's explicit Electronic/Digital Consent.

Financial Information Provider (FIP) (03/2017 - 01/2021)

- Allow the AA to discover customer accounts as per the identifiers provided by the customer on the AA domain. Allow the AA to request for financial information based on the customer consent presented in the FI request. Once data is available from the FIP source system to encrypt and notify AA of data availability.

Financial Information User (FIU) (03/2017 - 01/2021)

- Request for customer consent. Process notification from the AA when the customer has accepted/rejected the consent on AA domain. Store the customer consent and request for financial information via AA. Process the data ready notification received from AA, and call fetch API of AA to fetch the financial data.

OMRC (02/2021 - Present)

- Managing and creating trade reports as well as fixes the vulnerabilities.
