CAREER OBJECTIVE:

Enthusiastic and Creative Software Development Engineer with 2+ years of experience in developing various Java based applications and managing their production releases. Looking for an opportunity where I can use my expertise in Java development with problem-solving skills, helping organization's growth by challenging myself and bringing out best of myself.

KEY ACHIEVEMENTS:

- Achieved 20% reduction in memory consumption by properly initializing collections, removing duplicate strings and refactoring the code.
- Migrated applications successfully to Wildfly application server from Glassfish.

ACADEMIC SUMMARY:

- **L. D. College of Engineering, Ahmedabad (GTU)**
B. Tech in Information & Technology, June 2018
CGPA 8.51/10
- **Navsari High School, Navsari**
12th -- 81%, GSEB - 2014
10th -- 90%, GSEB - 2012

SKILLS:

- Technologies : Java 8, Spring Boot, Spring Data, Spring Cloud, Hibernate, Microservice, JSP, Servlet, Apache Kafka, Apache httpd, Redis, Mockito, HTML, CSS, JQuery
- Database : MySQL, MongoDB
- Application Server : Wildfly 8.x, Glassfish 4.x
- Build tool/Version control : Gradle / GIT, Jenkins

EXPERIENCE:

Software Development Engineer at NuFuture Digital India Ltd., Ahmedabad, July 2018-Present

- **Rule Engine:**
Worked as a primary developer in team of 7 on modules like define rules, perform reward eligibility by executing predefined set of rules and reward distribution for transactions of Future pay, online channel using **REST APIs** based on **Spring boot micro-service** architecture with **Kafka**, **MySQL** database, **MongoDB** for transactional data.
- **Campaign Manager:**
Worked in a team of 4, developing dynamic front-end using **Spring MVC**, **jQuery** along with back-end -Kafka integration with multiple application, campaign-creation, assign-rule, execute-transaction REST APIs based on Spring boot, **Redis Cache**, MySQL and MongoDB.
- **Promotion Workflow Management:**
Worked on a performance improvement of legacy EJB project, By using **JMS** for Async processing, **multi-threading** for independent tasks which were taking long time due to network call. Achieved **20% reduction in memory consumption** by properly initializing collections, removing duplicate Strings.
- **Coupon Management System:**
Worked on Enhancement of coupon creation, validation and redemption functionality, enhancement in integration with SAP system in a legacy **EJB** based project.
- **Payback Integration:**
Worked on integration with **SOAP based API** of Billing system to verify bill details, which was used to identify valid bill when customer comes to earn payback points after billing has been done.

STRENGTHS:

- Determined to learn with practical approach and Good Team player
- Enthusiastic and can produce results under deadline constraints
