🔍 EDUCATION

B.Tech MIET Meerut(UPTU)
XIIth Kendriya Vidhyalaya, Fatehgarh(UP)
Xth Army Public School, Fatehgarh(UP)

🔍 SKILLS

Skills	Manual Testing, Automation Testing, API Testing
Programming	Java, SQL
Frameworks	Selenium, TestNg
Databases	MySQL, PostgreSQL
Development Tools	IntelliJ IDE, Eclipse, Maven, Git, Postman, Jmeter, Katalon Studio
Operating System	Windows, Ubuntu

🔍 EXPERIENCE

Company : Neumeric Technologies Pvt. Ltd.(Nov 2019-Present)

Position : Quality Analyst(Automation)

Role : I worked as an Automation Tester and also supported Manual Testing as well. My responsibility includes creating testcases from requirements and then automate them through selenium and reporting the defects.

Company : Smalsus InfoLabs Pvt. Ltd.(March 2018 - Sep 2019)

Position : Test engineer

Role : I am being responsible for testing a website name 'SURVEY'. It is a SaaS based Customer Success Management(CSM) project. I have tested that website thoroughly by making different test cases. I have tested the all aspects of that application like design, properties, permissions etc.

PROJECTS

STRES, WEBAPP, SELENIUM, AUTOMATION

2020

STRES is the Public grievances portal of Utah Department Of Commerce. It is a Web-Application which primarily aims to enable submission of grievances by the citizens from anywhere and anytime (24x7) basis to Departments/Organisations who scrutinize and take action for speedy and favorable redress of these grievances..

In this project I have done functional testing. There are 2 modules Firm and Individual where they can file a complaint, track a complaint and see the actions taken. There are many Webtables, Dropdowns, Iframes etc. I used Selenium with java to write the testcases script. I have created Maven Project for these testcases to write. I have also used various libraries like Apache POI, TestNG etc.

Selenium Maven Testng POI Git

SURVEY, WEB APP, RESTFUL, JAVA

2019

Survey is a web application that is used to interact with the customer for getting the information about the product and its behaviour in the market. It is generally used to get customers feedback and reactions by companies. It can also be used for promotion of a product by sending links to customers in the database with just one click.
