WORK EXPERIENCE

Software Engineer (2.5 years) Webkul Software

2019 - Present

Noida Sec-63

Achievements/Tasks

- Working on Microservices Architecture, implementing REST APIs and Full Stack development using technologies, such as Java, J2EE, Spring, Hibernate, etc.
- Created CMS APIs for multiple clients, on SPRING REST, for integration on Mobile Applications and for Web.
- Created Marketplace Solutions, e-commerce connectors according to the client's specific business requirements.
- Working on JSP and SERVLET technology, for full stack development, also working on Spring REST and Spring MVC with Thymeleaf for frontend.

NOTABLE PROJECTS

Marketplace CMS Microservice

- CMS for mobile and web application, comprising of buyers and sellers, managed by the administrator. The project comprised of a mobile app, and web UI, based on microservices. I worked on the SPRING REST application, for providing the APIs for the marketplace.

Amazon Connector and Shopify Connector

- Worked on integration of an ecommerce platform according to client's need to connect Amazon connector and Shopify connector on a single Servlet application, allowing product import / export with these ecommerce platforms.

Hyperlocal Marketplace

- Created a hyperlocal based online marketplace, serving according to selected location, having an end to end functionality for buyer and the seller, managing inventory and the cash flow, along with integrated payment methods, as well as delivery management, on Servlets and Jsp.

Moodle Connector integration

- A learning management system, that fetched the course, and their categories details from Moodle application(SAAS based) and integrating them for use, in SPRING environment, according to the client needs.

EDUCATION

Bachelor Of Technology(Btech.) - Computer Science

College Of Engineering Roorkee

2019

75% Aggregate

Senior Secondary (12th)

Deep Memorial Public School

2015

85% Aggregate
