

## WORK EXPERIENCE

### **Edunext Technologies Pvt Ltd – Software Developer (12/2018 –Present).**

I am in Development team and I work on School ERP Software . Edunext's School ERP Software is opted by more than 550 top schools in India including DPS, G.D Goenka etc. I have worked on various modules like School Configuration, Student Information System, Attendance Management, Fee Management, Examination Management, Library Management etc. I develop programs, modules, reports according to client's requirements and fix errors in existing code.

**Technologies:** Spring Boot, Spring, Hibernate, Servlet, JSP, MySQL, JSON, XML, Java Script, AJAX.

### **Ray Theory Pvt Ltd- Intern (08/2018-12/2018)**

Worked on Project using J2EE technologies (JSP, Servlet, MYSQL).

## PROJECTS

### **1.Online Food Ordering System-Academic Project (04/2020-10/2020)**

It is a web application where users can open the application in web browser and view the list of the foods in category. Users can order the food in some easy steps. **Technologies used are:** Servlet, JSP following the MVC architecture and maven as a build tool. Using MySQL to manage data records, Apache Tomcat as a server and IntelliJ Idea as IDE. **Issues faced are :** Understanding User requirements and develop DFD's Database tables and modules accordingly

### **2.Online Cab Booking System-Academic project (08/2017-02/2018)**

It is a web application through which customers can view available cabs Register the cabs, view profiles and book cabs .User can book cabs and admin can confirm/cancel the booking on the basis of cars and drivers.

**Technologies used are:** Servlet, JSP following the MVC architecture and maven as a build tool. Using MySQL to manage data records, Apache Tomcat as a server and Eclipse as IDE. **Issues faced are :** Building Database tables, UI.
