WORK HISTORY

1. Working in SGM Source InfoTech, Akurdi Pune (SEP 2016 to NOV

2018)

1) **Project Name:** Credit Management System

- **Role:** Java Developer
- **Technology used:** Java(Spring MVC ,Hibernate),MYSQL. Layer Shift Cloud
- **Role and Responsibilities:** Total Project Designing and Development.
Developed Application logic using Java, JSP, Servlet. Unit testing at module level.

- **Achievement:** Key member of a Banking Product development team for Loan Origination, Loan Management. Product is currently live with some of the Credit systems.
-

2. Organization: Ebix Technologies Pvt. Ltd(erstwhile Indus Software Technologies Pvt. Ltd.)(05 NOV 2018 to Till Date)

- **Role: Java Developer**
- **Technology used:** Java(Including Spring, Hibernate),Oracle.
- **Achievement:** Key member of a Banking Product development team for Loan Origination, Loan Management. Product is currently live with some of the major Banks and NBFCs using these products
- **Projects Description:**
- Developed Banking Products named Loan Origination System ,Loan Management System and Disbursement Module.
- Working with CORE PRODUCT Team(LMS,DM)

1. Loan Origination System(LOS)

- When a customer(Individual or organization) applies for Loan,LOS comes into picture.
- The details of the Customer like Address details,Name,Applied Loan Amount, PAN ID is capture in the First Stage.
- After that CIBIL Checking activity of the Customer happens.
- Then Dedupe(Duplicate Customer) checking activity comes into picture followed by Eligibility based on income, Decision to Offer the Loan.
- Once the amount of loan is decided amount is Disbursed to Customer's account.
- **Project Duration** : 14 months

My Role And Responsibilities:

- Designed and developed Java Class,JSP Pages using Html,CSS,Java Script for each of the Activities.
- Created Procedures,Cursors,Views,functions to calculate Tax,Eligibility,fee etc
- Developed Web Application of the Loan Origination System.
- Build and Deployment in the Server using Maven, Subversion.
- **Tools Used:**Eclipse,Notepad++,Winmerge,PLSQL Developer
- **Technologies:** Java ,jsp,Spring boot,REST API,PLSQL,JavaScript

2. Loan Management System(LMS)

- Once Loan is Disbursed to Customer's Account LMS comes into picture.Here Loan Amount, Rate of Interest,Tenure,Cycledate,address details which are captured in the LOS moved through Interface.

- During disbursement of the Loan to Customer's Account data is sent to LMS through Interface using Webservice.
- Tables and Fields in Oracle of LOS are Mapped with Respective Tables and Fields of LMS and data are sent creating SOAP Request.
- Functionalities come under LMS are
- -Part Prepayment/Full Prepayment
- -DRE(Direct Receipt Entry)
- -Charge Booking/Charge Waiver
- -Reschedule of the Loan
- -Simulation
- -Payment History
- -Customer Details.
- **Tools Used:**Eclipse,Notepad++,Winmerge,PLSQL Developer
- **Technologies:** Java ,jsp, Spring boot,REST API,PLSQL,JavaScript

Project Duration : 11 months

My Role And Responsibilities:

- Developed JSP Pages using Html,CSS,Java Script for each of the Functionalities.
- Created Oracle Procedures,Cursors,Views,functions to calculate EMI Bounce Charges,Tax Amount,Reschedule Charges
- Developed Web Application of the Loan Origination System.
- Build and Deployment in the Server using Maven, Subversion.
