Work experience

📅 09/2018 – PRESENT 📍 GURGAON, HARYANA

Business Technology Analyst - Java ZS Associates

- Worked on multiple Master Data Management projects as a Java consultant and developer
- Developed REST API framework solutions using monolithic and microservice design patterns for various business problems, such as Ad-Hoc Matching tool, visualization tool for pharma related metrics, Search before create utility
- Developed a selenium based automation tool using xPaths and generating a report for the same. This was developed using Singleton pattern extensively as there were many resources to be loaded, and xPaths were maintained externally
- Worked on developing a generic REST API framework for processing DQMs on the go
- Set up, managed and maintained a simple Jenkins deployment pipeline for Maven build using Maven POM hierarchy
- Developed custom widgets using JS with AJAX calls to REST APIs and integrated the same with Informatica MDM tool using XML manipulation
- Developed frontend for a data visualization tool as a

Work experience

Node project using ReactJS, React Router and ChartJS, manipulated data in charts using "axios", CSS, HTML

- Developed a simple file upload and download UI using JSP for an ad-hoc matching utility
- Active participation on project assessment, design & development phase for core MDM requirements as well, which required dealing with clients and data profiling and understanding business requirements and performing POCs on relevant MDM and ETL tools and creating POC level tools as well

Skills

Java 8 # Spring Boot 2.3 # Linux
Research # Netflix Eureka Server # ReactJS
Oracle 11g # Reltio # Informatica MDM 10.4
AJAX # Postman # Git # Microservices
H2 # Spring Cloud Config

Education

📅 08/2014 – 09/2018 📍 CHANDIGARH, INDIA
