**2. Project Name :** Openelis

**Role :** Team Member (Developer)

**Description :**

OpenELIS is a free open-source [laboratory information system](#) (LIS) designed to act as a "software and business process framework for the robust functioning of [public health](#) laboratories. OpenELIS originally began as an open-source software project with numerous important collaborations, with contributions coming heavily from the Minnesota State Public Health Laboratory and the University of Iowa. The larger international influence of collaborators such as the Association of Public Health Laboratories (APHL), the U.S. [Centers for Disease Control and Prevention](#) (CDC), and the University of Washington's International Training and Education Center on HIV (I-TECH) later spread the OpenELIS technology (in the form of separate branches of the software) to other parts of the world, including Vietnam, Haiti, and Côte d'Ivoire. This culminated in the first public open-source release of the software under the name "OpenELIS Global" in 2012.

**Responsibilities:** Developed the Code as per the requirements, handled different types of issues, test the code.

**Environment:** Java, struts, Hibernate, Prosgre, Eclipse, JSP.

4<sup>th</sup> July 2018 to 24<sup>th</sup> Feb 2021

**Company Name:** Euspace Technologies Pvt Ltd, Pune

**Project Details**
