

*I am looking forward to work in an organization, which provides the environment for growth with competent and strong leaders in Manual and Automation Testing having an experience in Functional, Non Functional, Globalization, UI Testing, API Testing, Automation Testing (Selenium Webdriver with JAVA). I have an urge and inclination for learning new technologies, a strong work ethic combined with a commitment to excellence in all projects undertaken.*

### Executive Summary

- Hands-on experience with **system testing, system integration testing, ad-hoc testing, smoke testing , regression testing**
- Execute all the **test cases** and **report defects, define severity and priority for each defect.**
- Involved in Web service testing using SOAP UI and Postman for API Testing.
- Create detailed & comprehensive **test plans and test cases** on a thorough understanding of requirements specification and execute the same.
- Good knowledge in testing and automating integration platforms using REST APIs with Java as the development language.
- Knowledge of source code repository (Git) along with build tools (Maven)
- Anticipate, Identify and collect **test data** related to **test cases** if needed.
- Execute functional based **test cases** and **End testing** of Web application testing from field devices
- Perform **Exploratory testing** and **Sanity testing** as per need basis.
- Good communication and interpersonal skills.
- Expertise in **Smoke, Functional, Integration, and Regression Testing.**
- Experience working in an Agile environment.
- Creative, independent, self-motivated and willing to learn new technology.
- Strong troubleshooting and root cause analysis abilities.
- Good knowledge of object-oriented design and implementation.
- Familiarity with Amazon Web Services or any other cloud infrastructure
- Excellent problem-solving skills.
- Excellent knowledge of **SDLC, testing life cycle.**
- Derive write **test cases, use cases** from scenarios for the new feature additions in the product.
- Good knowledge of **OOPS concepts, Collection framework, Arrays and String Class** in JAVA.
- Having a good understanding of using **assertions and Annotations** in **TestNG** framework.
- Working experience on **Java ,Selenium ,POM, TestNG , Maven, Web application automation, Maven, Eclipse**
- Strong knowledge on Scripting and Framework (**Selenium Web driver and API**)
- Expertise in automating the manual tasks with Batch - Shell scripting, API framework development, Automation framework migration
- Functional expertise on Eclipse - **Java, TestNG, Maven and Web application automation**
- Good Java programming knowledge.
- Good Knowledge in **Selenium Commands.**
- Work experience on API testing & Database testing will be added advantage
- Understanding of Functional and Regression Test Automation
- Interpretation and modification of code as required including **SQL scripts, queries.**

### Educational Qualification:

- **Bachelor of Engineering** from **Pune university, Maharashtra.**

### EMPLOYMENT HISTORY:

**Designation** : QA Test Engineer  
**Organization** : Eclerx India Pvt.Ltd  
**Duration** : July-2019 TO till date

### SKILL PROFILE:

**Operating System** : Windows Family ,UNIX  
**Testing Process** : Manual & Automation Testing  
**Programming Language** : Java, SQL and UNIX

Test Management Tool : JIRA,HPALM

## Professional Experience:

### Current Project

**Project name : Venture Capital System**

**Client : K2 Venture Capital System**

**Domain : Investment Banking**

**Role : Software Test Engineer**

### Description:

Major subsidiaries include K2 VENTURE CAPITAL, which offers retail services such as online trading to individual investors and investment banking as well as K2 VENTURE CAPITAL Capital Markets, the firm's international investment banking arm (with a presence across Asia, Europe and North America) that provides M&A advisory, sales and trading services in a variety of financial products to corporate and institutional clients.
