OBJECTIVE

I am aspiring candidate looking for utilizing my skill sets in a more working environment where my skills are being utilize up to the mark and I am able to see my career growth as well.

PROFILE SUMMARY

- Having **3 years** of work experience in Software Development using **Java** and **J2EE** technologies.
- Expertise in designing and developing Multi-tier enterprise level web applications using various **J2EE** technologies **JSP, Spring MVC, Spring Boot, Rest Services** technologies.
- Experience in **Spring 4.2 Annotations**.
- Strong Experience in **REST API** based **WebServices**.
- Having Knowledge on **Spring5**.
- Having Knowledge on **MongoDB**.
- Having Knowledge on **Microservices**.
- Expertise in implementing various Object-Oriented Design Patterns such as **Front Controller, DAO, Business Delegate, Service Locator, Strategy, Singleton** and some of **GOF** Patterns.
- Sound understanding of entire Software Development Life Cycle with work experience in almost all phases like requirements gathering, Design, Coding, **Unit Testing** and **Bug fixing**.
- Experience in **Apache Tomcat ,JBoss Server**.
- Experience in working with **Oracle 11g** and **MySQL**.
- Highly motivated self-starter with good Communication, Presentation and Problem Solving Skills and committed to learning new technologies.

PROFESSIONAL EXPERIENCE

- Working as Software Developer at Proclan Technologies Pvt.Ltd. Pune from February 2017 to till date.

EDUCATIONAL QUALIFICATION

- M.C.A From Savitribai Fule University Pune in the year of 2017 with 62%.
- B.C.A From Sant Gadge Baba University Amravati in the year of 2012 with 65%.

TECHNICAL SKILLS

Languages	Java, SQL.
JEE Technologies	JDBC, JSP, Servlets, Jndi,and JMS
Web Technologies	XML, XSD, HTML, Java Script.
Distributed Technologies	Restful Services.
Frameworks	Spring (Core, JDBC, AOP, Transactions, MVC),Hibernate, Spring Boot, Spring Data.
Design Patterns	GOF Design Patterns: Factory Method, Abstract Factory, Strategy, Template Method, Adapter, Singleton, Front Controller, Business Delegate, Business Object, Dao, Service Locator.
Web/Application Server	Apache Tomcat ,Jboss Server,WildFly
Databases	Oracle 11g, MySql
Java IDE	Eclipse, STS
Operating Systems	Windows
Tools	MySql Workbench, SQL Developer, Maven, SVN, GIT, Junit, Log4J, JIRA.

PROJECT SUMMARY

• **MedSalesKraft**

Client : Asklepion

Role : Team Member

Environment : Core Java ,J2EE, SpringFramework, Spring Boot, MySQL, JQuery.

Duration : January-2018 – Till Date

Description :

In this web application we are monitoring and keeping all the records of Medical Representative(MR) all higher authority like Area Sales Manager(ASM), Regional Sales Manager (RSM).Modules of applications are like Admin, Tour Plan, Order, Product Pitching, Product Preferences, Samples, Gifts, and Notifications. Admin initiates with adding all the details of clients like Doctors, Distributors, Retailers and Hospitals.

Responsibilities:

- Used **Spring Boot** to create this application .
- Implementing Service and DAO components in the application.
- Writing **Spring Jdbc** code to communicate with database.
- Implementing **Restful Services**.
- Used **log4j** for the error logging purpose.
- Involved in Unit testing and Test case creation.

• **Warehouse Management System (WMS)**

Client : Proscio Laboratories

Role : Team Member

Environment : Core Java, J2ee 6, Spring Framework 4.0, Hibernate 4.3.

Duration : December-2017 - January-2018

Description :

This product is specially designed for maintaining track of pharmaceutical goods from Inward to outward process. Inward Goods come from manufacturing companies to organization and outward goods distributed to different stockiest from organization. Throughout this process this product is use for maintaining information about all manufacturing companies, organization employees, stockiest, transporters, carting agent, inward and outward couriers and also generates cases stickers and gate pass.

Responsibilities:

- Understanding the Business Requirement and Design document.
- Developed and implemented the MVC Architectural Pattern using Spring Framework including JSP, Hibernate, Rest Services and Mysql.
- Implemented Service and DAO components in the application.
- Writing Custom Validations based up on customer requirement.
- Used Log4j for logging errors, messages and performance logs.

- **OCR**

Client : Proscio Laboratories

Role : Team Member

Environment : Core Java, J2EE , Spring Framework 4.0, Hibernate 4.2.

Duration : March-2017 – December-2017

Description :

In this application, it read stockiest files (pdf, excel, xls, text) to get order from generated files. It can change order according to the order which is depend on type of products (capsule, syrup, box quantity) after read that files and store that information into database.

Responsibilities:

- Used **Spring Framework** to create this application on MVC architecture.
- Implementing Service and DAO components in the application.
- Used **log4j** for the error logging purpose.
- Involved in Unit testing and Test case creation.

I hereby declare that the information furnished above is true to the best of my knowledge.
