From July 2014 to Feb 2016.
5. Worked as software engineer in **Mridaz Softech Private Limited.**
From June 2012 to June 2014

Educational Profile:

Babu Banarsi Das Institute of Engineering Technology (UPTU)
B.Tech (CSE) year-2012

Technical Skills:

▪ Languages	: Core Java
▪ Web Technologies	: JSP, Servlet
▪ Data Base Connectivity	: JDBC
▪ Database	: Oracle
▪ Framework	: Spring, Spring Boot, Rest API, Microservices, Hibernate
▪ Tools / Utilities (IDE)	: Eclipse, JIRA , SVN, HPQC, TSM,,GIT,Confluence
▪ App Servers / Web Servers	: Apache Tomcat, Weblogic
▪ Platforms	: Windows family
▪ CMS Tool	: Oracle Web Centre Sites 11g , 12c, (Fatwire)

Project 1:

Title	:	Avaya-OneCare
Role	:	Team Member
Client	:	Avaya
Team Size	:	7
Duration	:	Dec 2018 to Present.
Technologies	:	OWCS, JAVA, J2EE, Oracle, Spring Boot, Rest Service
Web Server/App Server	:	Tomcat 7.0, Weblogic
Tools	:	HPQC,TSM, GIT, Eclipse, STS, Confluence, Jenkins

Description:

- This project is a development project of portal for Avaya. It involves development tasks along with understanding and setting up of the environments since it is an additional inception from other company. It involves business requirement implementations as per Avaya along with maintenance in terms of defects.

Roles & Responsibilities:

- Providing quick solutions to functional, deployment and environment related issues.
- Worked on Web Center Sites and Oracle Web Center Content setup and configuration for Avaya SPP.
- Client interaction for system study, requirements gathering, analysis and scoping.
- Worked on asset modelling, asset optimization for smooth implementation of complex business requirements along with developing new Templates, Page Definition, Attribute Editors, Content Attributes, Content Definitions etc.
- Providing efficient solutions for performance improvement.
- Scheduling regular client calls for status reporting, onshore, offshore coordination.

Project 2:

Title	:	Online Solutions System
Role	:	Team Member
Client	:	Maybank.
Team Size	:	10
Duration	:	May 2018 to Present.
Technologies	:	Java, JSP, Servlet, OWCS (Fatwire), Spring, Hibernate
Web Server/App Server	:	Tomcat 7.0, Weblogic
Tools	:	HPQC,TSM, SVN, Eclipse

Description:

- This project is a development project of portal for Maybank. It involves development tasks along with understanding and setting up of the environments since it is an additional inception from another company. It comprises of business requirement implementations as per Maybank along with maintenance in terms of defects.

Roles & Responsibilities:

- Providing quick solutions to functional, deployment and environment related issues.
- Worked on Web Center Sites setup and configuration for Online System Solutions.
- Client interaction for system study, requirements gathering, analysis and scoping. Worked on preparation of System Design Document, HLD and LLD for integration of Knowledge Management project with Online System Solutions.
- Use of OWCC with WCS for interaction with content uploads.
- Worked on asset optimization for smooth implementation of complex business requirements along with developing new Templates, Page Definition, Attribute Editors, Content Attributes, and Content Definitions etc.
- Create, maintain and track all aspects of project documentation, technical documentation, review checklists related to change requests and defects.
- Scheduling regular client calls for status reporting, onshore, offshore coordination.

Project 3:

Title	:	Du-Self-Care
Role	:	Team Member
Client	:	du Telecom.
Team Size	:	10
Duration	:	Feb 2016 to March 2018.
Technologies	:	Java, JSP, Servlet, OWCS (Fatwire)
Web Server/App Server	:	Tomcat 7.0, Weblogic , JBoss
Tools	:	HPQC,TSM, RTC , SVN, Eclipse

Description:

- This project is a development project of portal for DU Telecommunications. It involves development tasks along with understanding and setting up of the environments since it is an additional inception from another company. It comprises of business requirement implementations as per DU telecom along with maintenance in terms of defects.

Roles & Responsibilities:

- Providing quick solutions to functional, deployment and environment related issues.
- Worked on Web Center Sites setup and configuration for Self-care.
- Client interaction for system study, requirements gathering, analysis and scoping. Worked on preparation of System Design Document, HLD and LLD for integration of Knowledge Management project with Self-Care.
- Use of EDMS (Content System) with WCS for interaction with CRM for document uploads.
- Worked on asset optimization for smooth implementation of complex business requirements along with developing new Templates, Page Definition, Attribute Editors, Content Attributes, and Content Definitions etc.
- Create, maintain and track all aspects of project documentation, technical documentation, review checklists related to change requests and defects.
- Scheduling regular client calls for status reporting, onshore, offshore coordination.

Project 4:

Title	:	Digital: Asia Intelligence
Role	:	Team Member
Client	:	J.P. Morgan
Team Size	:	8
Duration	:	September 2014 to February 2016.
Technologies	:	OWCS (Fatwire), Java, Servlet and JSP
Web Server/App Server	:	Tomcat 7.0
Tools	:	Jira, SVN, Eclipse

Description:

- Digital: Asia Intelligence is a key project to provide service to the prospects of the business to provide them business inside and convert them into clients.
- Have worked on this project as a software developer on Java, Oracle, OWCS, scripting and other web technologies. I have extensive experience of managing issues/releases and working with Business Analyst, Cross teams, Production operate etc.
- Coordination and regular communication with Client Teams/stakeholders on functional as well as technical aspects.
- Taken ownership of this product and coordinated/negotiate any issues, design, implementation or enhancement related to this application with all Stakeholders including client.

Roles & Responsibilities:

- Interacting with the client for system study, requirements gathering, analysis and scoping.
- Development, Unit Testing and UAT Support. Post production support.
- Create, maintain and track all aspects of project sprints related documentation, technical documentation, review checklists.
- Provide utilities for process improvement that reduced efforts and made the process smooth and error free.
- Scheduling regular client calls for status reporting, onshore, offshore coordination.

Project 5:

Title	:	I-Post
Role	:	Team Member
Client	:	ICICI Prudential
Team Size	:	4
Duration	:	October 2012 to May 2014.
Technologies	:	Core Java, Servlet, JSP, Hibernate, Spring
Web Server/App Server	:	Tomcat 7.0

Description :

- E-Post is a web based portal to keeping records of the couriers in an organization where daily couriers are in bulk amount and the record keeping of the sent and received couriers become a headache like banks, travel agency, Insurance Company. This reduces the time consumed in keeping record of courier and budgeting of the courier.

Roles & Responsibilities:

- Involved in writing JSP.
- Involved in writing business logic in servlets.
- Involved in writing business logic.
- Involved in writing DAO classes.

Declaration of Authentication:

I have by declared that the above-mentioned information is correct up to my best knowledge and belief and I bear the responsibility for the correctness of the above-mentioned particulars.
