EDUCATION

GANDHI INSTITUTE OF ENGINEERING & TECHNOLOGY

B.TECH IN COMPUTER SCIENCE
Session 2015 - 2019 Gunupur, Odisha |
Cum. GPA 8.2

INDIAN SCHOOL OF LEARNING, JHARIA

BOARD: CBSE | MAY, 2015
Dhanbad, Jharkhand Percentage: 68%

RAJKAMAL SARASWATI VIDHYA MANDIR

BOARD: CBSE | MAY, 2013
Dhanbad, Jharkhand Cum. GPA 8.4/10

SKILLS

LANGUAGES:

Proficient:

•NodeJS •JavaScript •C

Familiar:

•ReactJS •Angular

•Web3.js

FRAMEWORK:

•ExpressJS •KeystoneJS

DATA BASES:

•MongoDB •MySQL

•Redis •Firebase

MISCELLANEOUS:

•GitHub •NPM •Yarn

•Docker •Nginx •Linux/Ubuntu

•AWS EC2 •AWS S3

•Solidity

COURSEWORK

GRADUATE

System Programming

Software Engineering

Design & Analysis of Algorithms

Operating Systems

Switching Theory and Logic Design

EXPERIENCE

DELIMP TECHNOLOGY Noida-2, Uttar Pradesh

NODEJS DEVELOPER | JAN,2021 - CURRENT

- Design the required API according to the given specifications and do the back-end related handling.
- Meetup with the client to gather the information and convey the project progress details, mentor the juniors
- Debugging & bug fixing.

CAVISSON SYSTEM INC. Noida-63, Uttar Pradesh

ASSOCIATE SOFTWARE ENGINEER | JAN,2019 - OCT,2019

SOFTWARE ENGINEER | OCT,2019 - JAN, 2021

- Worked with Core NodeJS team on Agent (APM Tool) to capture Business transactions and flow paths.
- Implemented many services like HTTP, Rest API, on Netjsagent, SAAS Mode to Authenticate Users.
- Support provided for the application on daily basis and responding to user queries for validation of exception.
- Hosting and Log monitoring of web application.

PROJECTS

NETJSAGENT (NODEJS AGENT) | CAVISSON SYSTEMS

Jan 2019 to Jan 2021

NodeJS agent is a Internal Profiling tool to diagnose the response time of web application built on NodeJS. using Netjsagent, a NodeJS application is instrumented so that events such as a new method encountered, method entry, exit etc. can be captured to be processed later to derive the drill down reports. Such reports may be utilize to identify and thus rectify any performance issues in the application. NodeJS agent provides simple and intuitive view of live application traffic and all contextual analysis germane to the monitoring and diagnostics.

AQARCHAIN.COM | DELIMP TECHNOLOGY

Feb 2021 -current

Real state platform where a user can list/buy/sell properties. The platform has different role/responsibilities for different users. Has Admin and Super-admin panel for special priviages.

- Developed API and handle server side logic.
- For dealing with the users data used MongoDB
- Successfully took over and managed the Front-end.
- Virtual meetings with clients to get requirement specification and design/develop accordingly.
- Server deployment and configuring Nginx and linking the API with front-end (ReactJS) code.

USECURIOUS.COM | DELIMP TECHNOLOGY

Feb 2021 -current

Dockerized application based on KeystneJS v4.2 and React Native. The app's is to almost replicate the twitter working. Here a user creates poll/question and the followers/friends can see and react on them (like, comment, retweet, share, etc)

- Developed the Micro-services, API's and handled the server side logic using NodeJS along with KeystoneJS and MongoDB.
- Front-end based on ReactNative
