## PROJECTS

### PSD2 -Payment service directive

15 months

Expose API's to third party providers to get details/information of bank customers only when customer give their consent.

It has following modules:

- Accounts
- Payments
- Consent
- Confirmation of Funds

Major role in this project is:

- API development and testing

- Jenkins pipeline creation
- Deployembt on opemshift
- Configuration on Apigee
- Postman automation via jenkins

### **Scale improvement engine**

*19 months*

This tool was developed to watch real time traffic on maultiple production servers. Objective of this was to block usees which are generating heavy traffic on servers. Customers using third party applications are prone to DOS attack on live servers, using ELK we are monitoring live traffic and blocking users which are generating DOS.

### **New Voice Portal**

*20 months*

Developed restful API's to access voice mails from his/her device. User can SAVE/DELETE messages and he/she can check the information of sender. Used POP3 protocol to fetch messages from mailing server.

### **SIP Automation Tool**

*18 months*

Worked as automation engineer for TDC client. Automated vafious calling scenarios for SIP based IMS services. Also, valifated SIP call flows generation for executed tests.
