Experience Summary

3.6 years of experience in java development, web service development, Payment gateway. Experienced in infrastructure deployment, Payment gateway, application deployment of restful API, micro-service on cloud platform. Have worked in analysis, design, coding, testing and deployment of aforementioned applications following agile methodology.

- Worked in applications with Java and Spring boot from a development perspective.
- Worked in fronted technology with Angular, JavaScript from a web development perspective.
- Comprehensive knowledge of includes Analysis, Design and Development of Web-based applications.
- Developing and deploying restful microservices on cloud and client CDP platforms.
- Developed java-based web applications with microservices implementation.
- Worked with CDP pipeline, Kubernetes and Git.
- Good knowledge in RESTful Web Services.
- Excellent interpersonal skills, motivated, energetic with demonstrated proficiency for learning innovative technologies.
- Has the motivation to take independent responsibility as well as ability to contribute and be a productive team player.

Technology

- **Primary Technology:** JAVA, Spring Boot, web-service, Microservices and Rest Api development.
- **Secondary Technology:** Angular, JavaScript
- **Key skills in java:** Core-Java, Object-Oriented Programming, Rest API, JSON
- **Database:** MYSQL, MongoDB NoSQL
- **Unit test frameworks:** JUnit
- **Build tool:** MAVEN
- **Source code version control tool:** GIT, SVN
- **Operating Systems:** Windows Family
- **Documentation Tools:** TDP (Technological Delivery Platform), JIRA

Qualifications

Degree and Year	Institute	Result
Bachelor Of Technology (ECE)- 2015	Punjab College of Technical Engineering and Technology (Mohali, Punjab)	75%
12 th - 2011	D.S Women's College (Sohsarai, Bihar)	69 %
10 th - 2008	Girls High School, Harnaut (Nalanda)	75.2%

Work Experience and Project Details

COMPANY: GroupFio | **Cilent :**DBS | **Project:** PMO

Business Partner	DBS, Groupfio
Period	Oct 2019 to Till Date
Interface	PROJECT MANAGEMENT OFFICE
Description	PMO is an internal proprietary tool developed to maintain and access the DAH2 Projects, its budget and employees' data in an efficient and reliable manner.
Role	Sr. Java Developer
Responsibilities	<ul style="list-style-type: none">● Understanding the user Requirements.● Reviewing the BRDs and designing the application architecture along with the lead.● Attending daily scrum calls as it is an Agile API● Analysing the business Change Request and to prepare good application design and to fulfil the customer requirement.● Developing the backend coding for Rest web services.● Developing the code and performing the unit testing in order assure an end to end defect free solution
Solution Environments	Core Java , Spring, Spring boot, Microservices, MongoDB, Eclipse, Git-Hub, Maven, Tomcat

COMPANY: Experis IT | **Cilent :**1Pay | **Project:** NPCI

Business Partner	NPCI, HDFC
Period	July 2019 to September 2019
Interface	NPCI
Description	The purpose of this functional specification of this product is to provide payment gateways to prospective FASTag Issuing solutions as per the guidelines provided by NPCI. The main purpose of the document is to identify requirements and specifications concerning user input, system response, system data and related hardware and software.
Role	Sr. Java Developer
Responsibilities	<ul style="list-style-type: none">● Understanding the user Requirements.● Reviewing the BRDs and designing the application architecture along with the lead.● Attending daily scrum calls as it is an Agile API● Analysing the business Change Request and to prepare good application design and to fulfil the customer requirement.● Developing the backend coding for Rest web services.● Developing the code and performing the unit testing in order assure an end to end defect free solution.
Solution Environments	Core Java , Spring, Spring boot, Microservices, MySql, Eclipse, Git-Hub, Maven, JSP, Servlet

COMPANY: Experis IT | **Cilent:** IBM | **Project:** NEXT GEN TRANSFORMATION (Micro-services)

Business Partner	AT & T
Period	August 2017 to June 2019
Interface	NEXT GEN TRANSFORMATION
Description	Next GEN TRANSFORMATION is a micro-service project to manage the customer's data for AT&T. As working in the Contact domain, it will create an encapsulated Contact System of Record (SOR) for use with and by other Business Domains. Standardizes, and centralizes the contact data from various external SORs to provide timely contact information for greater Notification Customer Satisfaction and Maintain associations with Customer Hierarchy, Account, Location, Asset, Service, Order Status MS domains.
Role	Sr. Java Developer
Responsibilities	<ul style="list-style-type: none">● Understanding the user Requirements.● Reviewing the BRDs and designing the application architecture along with the lead.● Attending daily scrum calls as it is an Agile API● Analysing the business Change Request and to prepare good application design and to fulfil the customer requirement.● Developing the backend coding for Rest web services.● Developing the code and performing the unit testing in order assure an end to end defect free solution
Solution Environments	Core Java , Spring, Spring boot, Microservices, MySql, Eclipse, Git-Hub, Maven, JSP, Servlet

Awards and Interest

- Interested to learn new tools and technologies.
- Flexible to move from one technology to another.
- Achieved Managers Choice Award 2018 program for IBM practice Unite to get it done.
- Achieved Managers Choice Award 2017 program for IBM practice Put the client first.
