## PROJECT PROFILE:

### Project #1:

**Project** : Resource adda

**Environment** : Core Java, Spring, Spring boot, Spring MVC, Hibernate, MySQL

### Description:

The objective of the Project/Product is to create a platform to bring the Contract Staffing business under one umbrella that is **Resource Adda**. Currently, this business is happening in more unorganized form and our platform brings this business under Organized Sector. Ojas can expect revenues from Vendor Companies, Customers in the form of subscription and give this platform free of cost to Resources to market their profile.

### Roles & Responsibilities:

- Understanding the functional requirements and detailed design document.
- Attended for daily standup calls.
- Used GitHub for code repository.
- Experience in the Spring Framework & Hibernate (Spring MVC, Spring REST, Spring Boot)
- Developed User Interface Screens using HTML5, CSS3.
- Tested API's using swagger.
- Experience in working with global teams in Agile/Scrum methodology

### Project #2:

**Project Title** : Loan Scheduling

--	--	--

		
--	---	--

**Environment :**        **Java, Spring Boot, Hibernate, MySQL, HTML, CSS, Microservices**

**Description:**

This application is used to manage employee's loans in Payroll processing. By making use of the Loan Creation module, the payroll processing administrator can create a loan type specifying name of the loan type, interest type and the rate of interest. The interest can be either of Cumulative type or of Remaining Balance type. In Loan Scheduling module, the payroll processor can associate the loan type sanctioned for the employees with their payroll specifying the principal amount for the loan and the payroll period. Using Foreclosure module, the payroll processor can foreclose the existing loan of an employee if the employee pays the complete loan amount before the maturity period. In the report section, employee wise, month wise and loan type wise reports can be generated. The reports can be viewed and also be downloaded as an excel file.

**Roles & Responsibilities:**

- Discussion of impact and Dependency on requirement in daily Scrum meeting.
- Developed CRUD Operations.
- Used DAO to interact with the database.
- Participated Retro meetings and client meetings.
- Worked with Git version control tool.
