Summary: A curious Full stack developer with **2 years** of experience in developing and implementing applications. Seeking to leverage development experience and problem-solving skill in a challenging full stack role.

Technical Skills: JAVA, Spring Boot, JPA, EJB, JDBC, Microservice, JUNIT, JavaScript, Angular 6, Micro-frontend(Single-spa & angular 9), Oracle, RESTful API

Other Skills: JIRA,

Leadership: Sprint planning & estimation, suggest new ideas & improvements in the code.

Application developer, Marlabs Innovations Pvt. Ltd. (July 2019 - current)

Title: COP(Carrier Operation Portal)

- **Overview:** COP is a web tool developed using angular 6 and REST web services. The tool helps the Carrier Operations in Monitoring transactions, Reporting, Re-queuing & Re-working Transactions, the tool also has the provision to Monitor, Assign Agents work. All the users of the tool can track their work and history. It consists of 2 parts
 1. COP UI – UI Based on angular framework
 2. COP services – RESTful Webservices & JPA's
- **Users:** Used by Customer support, executives of the client.
- **Benefits:** Visibility & accountability to the client's operations.
- **Responsibilities -**
 1. Developed complex features & all backend services.
 2. Optimized heavily used APIs to keep the response time **under 150ms**.
 3. **Took feature ownership** and saw through the implementation of end-to-end features.
 4. **Understanding client requirements** and improvising implementation to the operation.

Achievements & Extras:

1. Optimized APIs in the project by resolving **N+1 queries** and following best practices.
2. Achiever of the best performer.

Education:

Jaypee University of Engineering & Technology	Computer Science Engineering	2014-2018	B-Tech
