Projects

SALES TRACKING APP
Created wireframes & designs based on the client requirements using Adobe XD with an interactive prototype. This is an employee tracking app through which they can track all itinerary records

BIOVIIX
Conducted research based on documents & created wireframes with a prototype using adobe XD & UI/UX for Customer App, also design an agent-based app for iPad.

MUSEUM
Created wireframes, designs, prototype based on the document. This app is based on a tourist platform through which users can get details of any place when they come to the device location by using this app.

RP MATCH
Created design based on the wireframes provided by the project manager. RP Match is a real estate app where a user can search and book the property
