PROJECTS UNDERTAKEN

- **Consumer Lending [NCB, Jamaica] | Onsite Software Consultant**
  Currently working on automating the process of different types of loans (Auto, Unsecured, Credit Cards). Was there in Jamaica for 4 months as a Software Consultant for Newgen Core Products and development of Middleware using Spring Boot.
  Technologies Used – Java8, Spring Boot, Agile, Intellij, GitLab, Octopus, iBPS, Omnidocs

- **Capital Market [National Commercial Bank Jamaica Limited, Jamaica]**
  The application was developed which allows customers to open an account at NCB Capital Market (NCBCM). It also allows existing customers to buy/sell assets. It has multiple sub-processes – Unit Trust, Payments, Equity, Bonds, IPO, Loans and Account Opening. The solution has interaction with multiple core banking systems like Unibanx, Finacle.
  Technologies Used – Java8, Eclipse, SVN, JavaScript, HTML, Omniflow, iBPS

- **Valuation Process [TCA by ETRADE, USA]**
  ETRADE is an independent RIA custodian offering fully integrated real-time technology, consultative services and back office support built exclusively for RIAs. Scope of Valuations Process is to generate PDF documents after specified Intervals. Batches of these PDF documents will be moved to Axway (SFTP) for Printing.
  Technologies Used – Java8, Eclipse, SVN, AngularJs, iBPS

- **WHITE GUIDE: An IoT Based Walking Aid for the Blind**
  Using Arduino and Android programming.
  (The application uses Bluetooth connectivity to communicate with Arduino device. It also provides real time tracking with SOS functionality.)
  Research Paper on the same was published in 2017 edition of **IJIRST**.
