Summary

Results-oriented software developer and research professional with 6+ **years** experience in both development and research positions. I make it my goal to create software with the user in mind, creating applications with a useable and intuitive user interface experience. I also understand the importance of creating highly readable and easily maintainable source code. I am constantly striving to learn new technologies and look to ways to better myself in this rapidly changing industry. I Started my Career as **Scrum Master** to till now I Worked Individually and with Team, Self Learn and Implement.
